

**WHAT LIES BENEATH US IS BEFORE US,
WHAT LIES BEFORE US IS BENEATH US**

Artist duo 'Fiorino & Ferreira' are currently touring the Kent Downs AONB with the Trickster Trailer - a mobile arts & ecology studio built out of waste materials salvaged from big Museums & Galleries.

Having spent time researching the geology of the Warren (Folkestone) & the Devil's Kneading Trough (Wye), they are now moving to Perry Wood.

They will be stationed at Perry Wood across January & February before continuing north to Burham Marsh & their final destination at the River Darent.

The artists are keen to host public walks, interviews, & collective creative activities: initiating conversations that reflect on people & their relationship to the land, ideas of home-making, belonging, & shelter.
